

# BETTER RETENTION

Using soft-tissue diode lasers for surgical procedures in your dental practice increases revenue and retention by decreasing time in the dentist chair and expediting patient healing. AMD's Diode Lasers has the right laser for your needs. They can perform a variety of procedures, from Laser hygiene to periodontal and other soft-tissue laser procedures, allowing you to expand the services you offer and stop outsourcing periodontal laser procedures.

## PICASSO *clario*

THE FIRST DIODE LASER SPECIFICALLY DESIGNED FOR DENTAL HYGIENISTS

The Picasso Clario is the first diode laser specifically designed for dental hygienists and it sports a symbolic purple color. The streamlined navigation and pre-set parameters based on diagnosis facilitate simple, controlled, and appropriate use of the laser for hygiene treatments. Portable and affordable, the Picasso Clario laser puts the power and art of laser dentistry in the hands of the hygienist.

### FEATURES

- Easy to Use Presets
- Wireless Foot Control
- Built-In Treatment Timers for Periodontal Treatment and Aphthous Ulcer Treatment
- Multiple Languages Menu
