

**MONET**<sup>®</sup>  
laser curing light

THE **FIRST** EVER  
**HANDHELD**  
LASER CURING LIGHT

1-Second Curing Revolution

[www.amdlasers.com](http://www.amdlasers.com)

The power of the Monet laser makes for a superior bond strength and faster, deeper, and more consistent curing results from virtually any distance.

**Portable and affordable.**

Composite Depth	Curing Cycle	With Attenuator
2mm or less	1 sec	Yes
2 – 3mm	1 sec	No
3 – 5mm	2 sec	No
5mm or more	3 sec	No

**Features:**

- Cure 6mm composites in 3 cycles of 1 second
- Cure 3mm or less composites in only 1 second
- 8mm Curing Depth
- Superior Bond Strength
- World's First Handheld Laser Curing Light

**Applicable Procedures:**

- Light activated polymerization of:
- Composites
  - Luting cements
  - Adhesives
  - Sealants

**TECHNICAL SPECIFICATIONS**

**Weight** 90 gm

**Dimensions** 8.5" x .75"

**Power Input** 4.2 VDC @ 2.0A

**Battery Charge** 300 Cycles

**Output Power** 2.0 Watts MAX

**Laser Classification** IV (4)

**Battery Type** Lithium Ion

**Wavelength** 450+5nm

**Power Modes** Continuous

**Irradiance at Distance - Measured Through a Standard 8mm Diameter Aperture**

Standard Output Settings
